Heating Solutions For Contemporary Living

Power supply installation guide - for bathrooms & under-tile living areas

Standard wall box vertically mounted

To power supply (max 15 amps)

Distance = 1.2 - 1.6 metres

20mm conduit to floor

Note:

Power must have RCD protection.

For bathrooms the load will be no more than 0.8 amps per sqm 'free floor area'.

For example:

9 sqm bathroom - bath, shower vanity = 5 sqm x 0.8 = 4 amps.

For larger areas the load will typically be 0.6 amps per sqm.
